

FEBIN NIZAR

Consultant — PwC India · Oracle Practice

febinnizar@gmail.com · +91 97175 95093 · linkedin.com/in/febinnizar · Mumbai, India

SUMMARY

Oracle Fusion consultant at PwC India delivering enterprise implementations across financial services and manufacturing clients. Background spans applied AI/ML product development at Nucore Software, three years of operations leadership at an oilfield services firm in the UAE, and an MBA from IIM Udaipur. Strongest on engagements requiring technical, operational, and strategic perspectives in combination.

EXPERIENCE

Consultant — PwC India

Mumbai, India · Jul 2022 – Present

- Lead Oracle Fusion implementations across AP, AR, Procurement, and Payments modules for enterprise clients in financial services and manufacturing, including integration, data architecture, and reporting components.
- Develop in PL/SQL and Oracle Fusion configuration; engineer Python and SQL utilities to handle bulk operations beyond standard tooling capabilities.
- Translate functional and stakeholder requirements into production-ready implementations, frequently serving as technical lead on client engagements.

R&D Specialist — Nucore Software Solutions

Kerala, India · Dec 2018 – Jul 2020

- Led a five-person team in the development of three new products and a new automation vertical.
- Architected and developed a machine learning system for the Amadeus ticketing platform, achieving 72% accuracy in airline fare prediction; integrated ML and neural network components into existing product lines.
- Headed the cybersecurity function, leading penetration testing and exploit discovery initiatives; spearheaded migration from ad-hoc version control to a git-flow development workflow.

Director, Operations — Al Nuhas Oilfield & Technical Services

Abu Dhabi, UAE · Dec 2014 – Aug 2017

- Reduced operating costs by over 26% and improved project turnaround time by 12% across a three-year tenure.
- Decreased per-project backend headcount requirements by 30% through redesign of inventory, accounting, and project operations workflows.
- Established an in-house material testing facility for quality control, replaced legacy IT and telephony infrastructure, and aligned corporate strategy with international certification standards.
